

Lindholmen Science Park

Lindholmen Science Park is an expansive research centre for new technology and communications, with emphasis on mobile data communications, intelligent vehicles and transports systems and modern media and design. Lindholmen Science Park currently houses approximately 230 technology companies and several university buildings connected to the Chalmers University of Technology and the University of Gothenburg. A total of 17.000 people come to Lindholmen every day to work or study.

Security Arena is a collaborative programme for research and development that aims to improve crisis management skills and making society better prepared to deal with serious threats and disruptions.

Programme December 10

13.00 Christmas lunch at Restaurant TRES

14.30 Presentations and demonstrations
