

ICT as tools for peace building, crisis management and disaster recovery

ICT4Peace aims to enhance the performance of the international community in crisis management through the application of information Communications Technology (ICT) – technologies that can facilitate effective and sustained communication between peoples, communities and stakeholders involved in crisis management, humanitarian aid and peacebuilding. Crisis management is defined, for the purposes of this process, as civilian and/or military intervention in a crisis that may be a violent or non-violent with the intention of preventing a further escalation of the crisis and facilitating its resolution.

Dag Nielsen has 13 years experience with international organizations, including 9 years of experience working for UN organizations and the International Federation of Red Cross and Red Crescent Societies, plus 13 years with Ericsson. He has been active in support to humanitarian operations in Indonesia, Iran, India, El Salvador, Peru, USA, Central African Republic and more. Among others Dag is currently a member of the ICT4Peace Policy Advisory Board.

Date: December 8, 11.30 – 12.30

Security Arena Lindholmen

Security Arena Lindholmen carries out research, methods and technology development applied to all phases of crisis management. Besides the research the work aims to conceptual development and pilot projects in collaboration between the industry, academia and end-users. This is a joint work between Lindholmen Science Park, Swedish Civil Contingencies Agency, Volvo, Saab, Ericsson and Chalmers. One of the goals is to spread knowledge about societal security and we are pleased to invite you to a series of free seminars about the research taking place at Security Arena Lindholmen.

Welcome!
